

# Brandon Wendell's Trailing Stop Method©

This strategy can be applied to any timeframe. There are no guarantees implied with this strategy and losses can and may occur. This strategy is presented for educational purposes only. Wealth Builders HQ, its affiliates and Brandon Wendell cannot be held liable for any losses that you may have while employing this strategy in any markets.

Using the Moving averages on the **Trend Time Frame** allows you to stay in trades until the trend itself has broken.

1. Once price has moved halfway to your first target, move the stop to breakeven.
2. Change your chart to the **Trend Time Frame**. The **TTF** is your **Zone Time Frame** multiplied by 4, 5, or 6.
3. You will then exit if one of three things happen:
  - a. Price hits your target, or
  - b. Price closes below the 8 EMA on your TTF (Trend Timeframe), or
  - c. Price breaks the 13 EMA on the TTF (no close needed)
