

eMini Think Tank Trade Ideas – Cancellation Criteria

The educational trading ideas are valid until one of the following happens:

1. Price hits Target #1 before hitting entry
2. For Longs if the RSI is less than 40 when price enters Demand. This is on the Zone Time Frame at the point of entry. The exception is Positive Divergence
3. For Shorts if the RSI is greater than 60 when price enters Supply. This is on the Zone Time Frame at the point of entry. The exception is Negative Divergence
4. If the Trend on the Trend Time Frame changes before price meets entry. Do not take the trade counter trend.
5. If price gaps open beyond the stops.
6. The entry price was hit before the class time, and you didn't have the trade idea in time.
